

Informed consent policy

All authors must send a letter stating that they have obtained permission to publish the manuscript from the patients involved in its preparation. Patients must be informed of the privacy conditions and care must be taken to ensure that they cannot be located by readers.

The text of the letter must be as follows:

The patients have voluntarily and expressly agreed to have their medical information published in Acta Médica Grupo Angeles, covering all necessary conditions of anonymity.

The manuscript

As the responsible author, I certify that I have the signed documents and that they are available to the journal at any time and that it is my responsibility to keep them in custody and ensure their security.

This document must comply with this text

_____ I authorize _____

To publish in Acta Médica Grupo Angeles the medical report of the disease that has affected me, called

In order to contribute to medical knowledge, anonymity and confidentiality must be maintained, which is the responsibility of

As the main author of the manuscript.
