In an endeavor to ensure a worthy participation of higher level in Cardiac Surgery, The Mexican College of Cardiovascular and Thoracic Surgery has taken steps at this regard doing everything and anything in our power to lay the foundation for the first group of Judicial Experts and Special Masters, to the full extent possible allowed by law in close relationship and connection to the attorney general's office, The Judicial/Judiciary Council (Consejo de la Judicatura Federal).

In addition, a second group of Judicial Experts and Special Masters authorized and recognized by the Dirección General de Profesiones, will be formed by some of the most qualified and collegiate members active today.

For this effect and purpose, the Mexican College of Cardiovascular and Thoracic Surgery has appointed a new special adviser in Government Affairs, Dr. Moisés C. Calderón Abbo, as well as our external consultant, Dr. Rosa Estela Juárez Pérez. With this initiative the College is looking for several legislative functions in conjunction with the Federal Government.

On January 15th of this current year, with the framework of our 2020 first annual meeting of the College, Dr. Rosa Juárez came forward with a general overview and proposal about the involvement of the Judicial Experts in the new criminal justice system in México, with special emphasis in Cardiovascular Surgery.

In coordination with Dr. Moisés Calderón and Dr. Rosa Juárez, a team of world class experts, we hope to find the highest quality standards for our first official list of Judicial Experts along the year 2020.

Do not miss out the opportunity to join us and take part of this historical and monumental task. This is your chance. The cage is open to members who are up-to-date with their payments and annual fees, and meeting special criteria.

Dr. Ovidio A. García-Villarreal, as President of the Mexican College of Cardiovascular and Thoracic Surgery, officially handed over the Diploma as our external consultant to Dr. Rosa Estela Juárez Pérez. January 15th, 2020, Mexico City, Mexico.
