

LETTER FROM SOMIB PRESIDENT

REVISTA MEXICANA DE
INGENIERÍA BIOMÉDICA

Vol. XXXI, Núm. 2
Diciembre 2010
p 95

Dear members, first of all I greet you, I want to highlight briefly two very important points for SOMIB.

The first relates to our Mexican Journal of Biomedical Engineering. After thirty-two years, we have the challenge of increasing its impact factor, therefore the initiative to help us to promote the magazine is that henceforth, the magazine will publish only articles which are written in English. This change will make it more attractive, not only to researchers from Mexico, but from any country wishing to publish their results in

our magazine. Therefore, this will be the last time we publish an article in Spanish.

The second point is to invite all of you to participate in all the necessary activities for the organization of the XXXIV National Congress of Biomedical Engineering that will take place from the 6th to the 8th of October of the 2011 at Ixtapa, Guerrero.

Thanks.

M. I. Juan Manuel Gómez G.
President
