

LETTER FROM THE EDITOR

REVISTA MEXICANA DE
INGENIERÍA BIOMÉDICA

Vol. XXXII, Núm. 2
Diciembre 2011
p 81

Dear members of the National Biomedical Engineering community; the second Journal issue represents once again a remarkable effort from the authors and editorial committee to produce a good scientific product.

I really appreciate the contributions sent by the Mexican researchers that still trust on the Mexican Journal of Biomedical Engineering. The joint work performed by authors, editorial board and the SOMIB directive panel has paid with a new important benefit: The Mexican Journal of Biomedical Engineering has been included in the SCOPUS index. This success is the result of the work developed by all persons who participate actively in the journal production. Congratulations and thanks to all of them.

I trust that this new result will promote an increase of the number of papers received from now and go on. Once again, I invite PhD students to submit partial and final results developed within your thesis.

Based on the aforementioned aspects, the editorial board of the Mexican Journal of Biomedical Engineering solicits proposals for special issues regarding the technical scopes considered in this journal. To make this proposal, please contact to the editor in chief through the email rmib.somib@gmail.com.

I want to express my gratitude to those who contribute to the Mexican Journal of Biomedical Engineering. This is the last number of this

journal under my editorial administration. Now, this journal will be directed by the well know and recognized researcher Dr. Verónica Medina Bañuelos. I'm sure she will take the journal to the next level based on her experience and research abilities.

I don't want to miss this opportunity to say thanks to all persons who were supporting me during the period when I was in charge of the editorial office of this journal: Juan Manuel, Arturo and Sindy, the current directive board of National Biomedical Engineering Society; Jimmy, Enrique and Sindy, the former directive board of National Biomedical Engineering Society and particularly to Mara, the perennial secretary of our society who was a very important support for me. Besides, my gratitude is also for the executive administrators in Medigraphic who were helping me to produce a high quality journal.

Finally, thanks to you, the readers of this journal to continue believing in this option and to become it in the main space for the Biomedical Engineering scientific production in Mexico.

Sincerely

Jorge Isaac Chairez Oria, MD
Editor in Chief
