Continued Growth of The Latin American Microbiology Journal

The past board of officers of the Mexican Society for Microbiology (Asociación Mexicana de Microbiología, A.C.; AMM) and the past Editorial Council of the Latin American Microbiology Journal (LAMJ) (Revista Latinoamericana de Microbiología; RLM), led by Dr. Enedina Jiménez Cardoso, President 2000-2002 of the AMM, started a new era for the LAMJ by placing the final edition and printing under the professional auspices of Ediciones Medicina y Cultura S.A. de C.V. Moreover, the availability of the LAMJ on internet was achieved (www.medigraphic.com).¹ In acknowledgment of such efforts and of those by other predecessors, we are committed today to a continued growth of the LAMJ.

To this effect, it is with pleasure that we welcome Dr. David Romero as the new Editor-in-Chief. Dr. Romero is at the Centro de Investigación sobre Fijación de Nitrógeno of the Universidad Nacional Autónoma de México, based in the city of Cuernavaca, Morelos, México. We are certain that the community of the LAMJ will benefit both from the enthusiasm and scientific rigor, as well as from the broad scientific perspective and the comprehensiveness in microbiology that characterize Dr. Romero. We are also fortunate

to have Amapola Soberón on the LAMJ staff. Ms. Soberón is a seasoned administrator for scientific projects, whose experience, thoroughness and carefulness, have allowed the implementation of electronic files and means that expedite the review of manuscripts. We also welcome the new Associate Editors, which were chosen from a variety of backgrounds to represent several areas of microbiology. It is pertinent to point out that the Editorial Board relies on an important cadre of reviewers from the LAMJ community, whose enthusiasm and commitment we salute.

We wish everyone all sorts of success, in the benefit of furthering microbiology and science.

Dr. Edmundo Calva
President 2002-2004
Asociación Mexicana de Microbiología, A.C.

ADDENDUM

By an inadvertent omission, the list of authors in the article "Serological survey in animals of "Q" fever in Nuevo León", Rev. Latinoam. Microbiol. 44 (2): 75-78, april-june 2002, should include Gustavo Hernández-Vidal. This omission was notified to this editorial office by authors José Antonio Salinas-Meléndez, Víctor Manuel Riojas-Valdez and Ramiro Ávalos-Ramírez.
