Revista Mexicana de Anestesiología

The Colegio Nacional de Anestesiología is decked by holding his great academic event, the «XL Annual Refresher Course in Anesthesiology and Perioperative Medicine» and the «IX Symposium on Perioperative Nursing». This year the emblazon is double because, in addition to our traditional event, the meeting «TIVA Mexico 2014» is rightly included. As usual, success is assured by the presence of members and a select group of teachers who will impart each of the lectures, symposia and workshops. For this event our president, Dr. Heberto Muñoz Cuevas, the Scientific Committee and the Board have designed an unprecedented course in which we will have large and pleasant surprises. One thing to note is the inclusion of the meeting of TIVA Mexico, scenario in which our school has positioned itself throughout Latin America thanks to the hard work and dedication of Dr. Muñoz Cuevas, who with his innovative vision has been the pioneer of this interesting and important branch of anesthesiology in our country, bringing progress and proposals beyond our borders.

Anesthesiology residents are especially important to our school because from them emanate future opinion leaders, teachers, researchers and clinicians who bear the responsibility to continue, preserve and enrich the legacy that was put into our hands by all the generations of anesthesiologists who preceded us. It is important to know their opinion and promote them in scenarios like this one. Therefore, and for the success of the two previous meetings the «Third Interagency Meeting of Residents in Anesthesiology» was organized, for which we called for residents of different health institutions and their teachers, all of them accepting with great enthusiasm, guaranteeing the success of this meeting.

It is important to remember that workshops of great theoretical and practical interest, that will be useful to hone your skills, were organized. Do not forget to register.

The supplement of the Revista Mexicana de Anestesiología that you have at your fingertips is excellent and with superb academic content, which gives you the features and value of a textbook. Each of the chapters that you will read are written by experts and masterfully summarize the substance of each of the sections of this course, highlighting Plenary Lectures, Specialty Chapters, Inter-Agency Residents Meeting and, of course, the excellent work of foreign teachers of TIVA Mexico course. This year's version is in electronic format, enabling us go green and be a part of this new global movement of Green Congress.

The Colegio Mexicano de Anestesiología reiterates the commitment of the continuing medical update, ensuring the quality and safety of care to promote,

organize and make available to all interested parties, scientific meetings such as this, in which the latest anesthesiology scenarios are analyzed and all the participating teachers are experienced and of international stature, ensuring the dissemination of knowledge.

Welcome and enjoy the event.

Raúl Carrillo-Esper, M.D.
Director Médico Editorial, Revista Mexicana de Anestesiología.
